**Subject:** Background fish split samples  
[Proposed background fish splits.xlsx](#)

Hi Jennifer,  
CDM Smith reviewed the proposed background tissue analysis and compositing plan, and came up with a tentative list of split samples. Please see the attached file.

We understand, due to mass requirements, that some things may change once weights of carcass and fillet composites are final , but as a courtesy wanted to provide Windward with this list.

Please let me know if you have any questions, and it would be appreciated if you can provide CDM Smith with a tentative schedule at your earliest convenience so we can work out logistics etc.

Thanks  
-gm
